Geoffroy GRANIER

Embedded Systems & AI Engineer

Contact

Location: **Paris, France**
LinkedIn: **Geoffroy GRANIER**
Portfolio: **Geoffroy GRANIER**

Informations

Age: 25 ans
Studies: BAC+7

Languages

French: Mother tongue

English: B2 (TOEIC 830)

Spanish: B2

Skills

Languages: C#, C, C++, Python, Java, HTML, CSS, JS, VHDL, Linux, SQL, ROS, MATLAB
Frameworks: React, Node.js, Flask, FastAPI
Embedded Systems: ESP32, eSIM, Modem, Robot, Drone, PCB, Raspberry Pi, Arduino, FPGA
Protocols: HTTP/HTTPS, TCP/IP, UDP, MQTT, CAN, USB, I2C, SPI
Other: Git, Docker, UI/UX, CI/CD, Drone operation

Soft Skills

Autonomous, Team player, Proactive, Organized

Interests

Travel: Europe, America, Asia, Africa
Sports: Volleyball, Gym, Swimming, Karate, Sailing

PROFILE

Generalist engineer with two master's degrees, specialized in embedded systems and information technologies.
My goal is to **design, develop, and deploy** innovative solutions in **artificial intelligence and embedded systems (drone, smartphone, robot, etc.)**.

EXPERIENCES

Embedded Systems & IoT Engineer
LASSENA – Montreal, Canada — *Jan 2025 – Jul 2025*

- Develop an **eSIM IoT Remote Manager** (Python, Flask, API, Firebase, Docker)
- Implement **secure protocols** (APDU, GSMA SGP.32)
- Design **dashboards** capable of remotely managing eUICCs (ThingsBoard)

Systems Engineer
Thales – Gennevilliers, France — *Sep 2023 – Dec 2023*

- Develop a **cross-platform Python tool** for automatic modem updates
- Build a **graphical interface** (Python, tkinter)
- Automate the **firmware update process**

Systems Engineer
Thales – Gennevilliers, France — *Feb 2023 – Sep 2023*

- Integrate an **embedded measurement system** (Modem, Raspberry Pi, GPS, IMU, Pixhawk)
- Develop **Python services** for data collection and transmission (Python)
- Create a **real-time monitoring system** (Grafana)

Embedded Systems
TwinswHeel – Cahors, France — *Apr 2022 – Jul 2022*

- Develop **automatic testing tools** for an autonomous delivery robot (ROS)
- Develop **analysis tools** (Jupyter Notebook)
- Test and Analyze **robotic performance**

Assembly line worker
Stellantis – Poissy, France — *Jul 2021 – Aug 2021*

- Participate in the **automobile assembly line**
- Perform **installation and quality control** of parts in the ferring sector

PROJECTS

Application for Customer Churn Prediction
ETS Montreal – Montreal, Canada — *Apr 2024 – Jun 2024*

Predict customer churn in telecommunications using demographic and behavioral data with Azure ML.

Student Dropout Risk Prediction
ETS Montreal – Montreal, Canada — *Apr 2024 – Jun 2024*

AI system predicting student dropout risk by analyzing academic and behavioral data, with web deployment and Flask API on the cloud.

Object Detection and Depth Estimation from a Single Image
ETS Montreal – Montreal, Canada — *Jan 2024 – Apr 2024*

Estimate object depth from a single image using monocular depth estimation and semantic segmentation.

Student ID Card Recognition
ECE Paris – Paris, France — *Sep 2021 – Dec 2021*

Design of a PCB coded in C for reading and recognizing student ID cards with Java interface and database connection.

EDUCATION

École de technologie supérieure (ETS Montreal)
Montreal, Canada — *Jan 2024 – Jul 2025*

Master's degree in Information Technology Engineering

École centrale d'électronique (ECE Paris)
Paris, France — *Sep 2018 – Jun 2023*

Generalist engineering degree with specialization in Embedded Systems
